- (54) CUTTING TOOL OF CUTTING-TYPE RICE-POLISHING MACHINE HAVING CERAMIC CUTTING TEETH FITTED THEREON
- (57) The present invention relates to a cutting tool of a cutting-type rice-polishing machine, wherein ceramic cutting teeth are fitted onto the cutting tool. Generally, a cutting tool is used in a cutting-type rice-polishing machine in order to cut the outer portion of unpolished rice, and the cutting tool is an assembly of alternating cutting rings and spacer rings. Each of the cutting rings has a ring shape of a constant thickness and gear-shaped trapezoidal cutting teeth formed on the outer circumference thereof, and polished rice is produced by cutting the outer portion of the unpolished rice with end edge portions of the cutting teeth. More specifically, the present invention relates to a cutting tool (100) used in a rice-polishing machine and having ceramic cutting teeth (15) fitted to a cutting tool body (11).

- (54) DEVICE AND METHOD OF IMPROVING THE PERCEPTUAL LUMINANCE
NONLINEARITY BASED IMAGE DATA EXCHANGE ACROSS DIFFERENT
DISPLAY CAPABILITIES
- (57) A handheld imaging device has a data receiver that is configured to receive reference
encoded image data. The data includes reference code values, which are encoded by an
external coding system. The reference code values represent reference gray levels, which
are being selected using a reference grayscale display function that is based on perceptual
non-linearity of human vision adapted at different light levels to spatial frequencies. The
imaging device also has a data converter that is configured to access a code mapping
between the reference code values and device-specific code values of the imaging device.
The device specific code values are configured to produce gray levels that are specific to the
imaging device. Based on the code mapping, the data converter is configured to transcode
the reference encoded image data into device-specific image data, which is encoded with
the device-specific code values. .

- (54) Method for Flotation of potassium Chloride
- (57) The present invention provides a method for flotation of potassium chloride ore, comprising carrying out an ultrasonic treatment before the flotation so as to emulsify and diffuse the flotation agent and improve the efficiency of the utilization of the flotation agent; or during the flotation so as to make the bubbles have a uniform distribution and a moderate size, increase the surface area of the bubbles and the opportunity of their contact with the potassium chloride crystal grains, so as improve the flotation effect; or both before and during the flotation so as to break the agglomerates of potassium chloride and sodium chloride, reduce the content of sodium chloride in the floated foams, and improve the grade of the potassium chloride product..
